

ENVIRONMENTAL CONSULTING & PERMIT SERVICES

Hamer Environmental, L.P. is a multi-disciplinary environmental consulting firm dedicated to helping clients solve natural resource issues. Our mission over the last 25 years has been to provide quality environmental consulting to land owners, land developers, firms, tribal entities, and government agencies. We have conducted numerous wetland delineations and ordinary high watermark determinations, wetland and stream classifications, critical area studies and reports, reconnaissance and feasibility studies, impact assessments, wildlife and fisheries studies, wetland, stream, and buffer mitigation plans, Biological and Habitat assessments for threatened and endangered species, and environmental monitoring. We provide construction monitoring, fish removal during construction, and expertise during stream diversions. We prepare permit applications such as the Joint Aquatic Resources Permit Application (JARPA) for Army Corps of Engineers (ACOE) Section 404/Section 10 and Washington Department of Ecology (WDOE) Section 401 permits, and Washington State Department of Fish and Wildlife (WDFW) Hydraulic Permit Approvals. We also prepare local Shoreline and floodplain permits and ensure projects comply with Critical Areas Ordinances. We prepare reports and permits for clients and regulatory agency review that are compliant with jurisdictional requirements.

Areas of Expertise

Our team of creative and innovative scientists takes pride in performing a wide variety of environmental studies, monitoring and documentation related to:
